

## Registration errors

**Prerequisite and test score error** – You do not have credit for the prerequisite on your records. If you do have the credit but it is not listed on your records, you need to show proof of successful completion of the prerequisite to an academic advisor and do a prerequisite bypass request. You should be able to see the prerequisite for a course on the class schedule by clicking the course number to see a description.

**Corequisite error** – You did not sign up for a course that is linked with the course you tried to sign up for. The course that should be taken concurrently should be listed in the error.

If you get a corequisite error and the section number starts with a “C”, this is a learning community (e.g. CGDD 2002/C76 and CSE 1301/C76). TRANSFER STUDENTS ARE NOT ELIGIBLE TO REGISTER FOR A LEARNING COMMUNITY. You must register for all courses in a learning community at the same time. Find all CRNs and put them into the text boxes on the Class Registration page before clicking “Submit Changes”.

**If it will not let you sign up for ANYTHING, find an academic advisor – Ashley, Martina or Beth.**

**Level restriction error** – you are trying to sign up for a graduate level course. That can’t happen, even if it is at a really good time for you or your only option.

**Major restriction error** – some classes want you to be a particular major in order to sign up for it. If you encounter this, you must ask the permission of the department in control of the course.

**Time conflict error** – you are trying to sign up for courses that are at the same time on the same days or may have some overlap. We will not override this.

**Class closed error** – the course is full. You should get on the wait list if there is one for the course (refer to their Wait List hand out sheet) or find an alternate course. If it doesn’t look like anyone is enrolled in the course, this is because the system does not display the amount of enrolled students once the course becomes full. We do not override full courses.

**Linked Course error** – you need to sign up for whatever course is linked to the class you’re trying to sign up for. Usually these courses are CHEM, BIOL or PHYS or something with a lab. This might be an alternate name for “Corequisite error”.
